

糸のひもが、早くカンタンにつくれる

ホルムパス ストリングガ-II

手芸ひもより器

Olympus String II

How to Use

Preparation of Embroidery Threads (6 skeins of 3-twine)

- 1 Have 6 skeins of embroidery thread ready

- 2 The end of the thread is buried under the paper band.

- 3 <Method 1> Hold the end of 2 skeins of thread together and pull out.

<Method 2> Remove the paper band and gently extend the thread. Hang 1 skein around your left hand. Have both ends together and gently pull the thread out by rocking the left hand.
This makes a two-strand thread.
(4m/4.4yards)

- 4 Fold 8m/8.8 yards thread in half, and fold in half again.
How the length of the thread became 2m/2.2 yards.

Revolution

It changes based on the thickness and length of threads. Refer to the following diagram.

Number of skein and Revolution	Length	2m/2.2 yards	4m/4.4 yards	8m/8.8 yards
Checker (1skein X 3)		5/10	1/10	2/10
Recluse, loop (1/2 skein X 3)		4/10	1/10	2/10

Counterclockwise twist Clockwise twist

<Tip> You will be able to twist without counting the revolution once you get used to the equipment.

The way to recognize it is standard for clock-twist to have a twice ball at the base of the hook. When sandwiching Y shape parts, the proper time is when the parts start turning. For counterclockwise-twist, it is best if 3 threads are twisted together to turn 3/8" before the base.

How to finish the end

- Knot and Cut off
The newly cut end of thread is inserted with a needle.
- Knot and Cut off Tassels
Belt and make tassels.
- Wrap with tape
Wrap the end with scotch tape or a mending tape.
- Knot Tassels
The tassels with a thread are inserted with a needle. Use a wooden, metal or ceramic bead.
- Add a separate Tassels
Make a tassels with a separate End Mold and add embroidery thread and add to the end of ring.
- Ball Tassels
Wrap the knot with embroidery thread.

Beautiful strings can be made with simple operation

Olympus String II is an equipment to twist strings easily. You can freely create beautiful handmade strings with easy operation.
Make variety of strings such as a thick, rough string with embroidery threads, thin and delicate laces or an elegant string decorated with accessory parts.

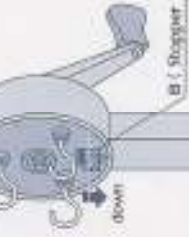

Right or left twists can freely be done!

There is variety of ways to use Olympus String II since it turns right or left direction.

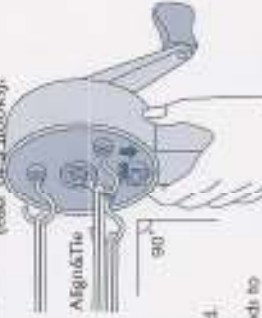

- Can rewind when twisted too much, and the intensity of twisting can be adjusted.
- Switch the direction of twisting to create a varied work.

Make String with Embroidery threads

- 1 B Bring B (stopper) down.

- 2 A Hang the looped and of 3 threads to A (lead of 3 hooks).

- 3 How to secure the end of thread.
Align the end of thread and tie. Use one of the following methods to secure the end and avoid tangling.

- 4 Clockwise twist
Turn (Handle) by giving a good bent to 3 threads.

- 5 Counterclockwise-twist
Bring (stopper) up while the threads are still hooked, then turn the handle to the same direction as 4 (counterclockwise).

- 6 Unhook the string from Adhooks) and tie tightly the end. Finish the end as you desire.
